SUMMARY

Computer Science undergraduate (B.Tech, Class of 2026) specializing in backend development with Java and Spring Boot, with hands-on exposure to enterprise B2B integration (MFT, EDI, X12/EDIFACT) via an internship at Cognizant and a strong DSA foundation (300+ LeetCode problems solved).

SKILLS

- **Languages:** Java, SQL, Kotlin
- **Backend Development:** Spring Boot, REST APIs, Web Services
- **Databases & Caching:** MySQL, Redis
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Computer Networks
- **Integration / Domain Knowledge:** Managed File Transfer (MFT), EDI, X12, EDIFACT
- **Developer Tools:** Git, GitHub, Maven, IntelliJ IDEA, VS Code

EXPERIENCE

Cognizant

May 2026 – June 2026

Intern, B2B Managed File Transfer (MFT) Training Program

- Trained across 4 core areas – Java, Spring Boot, Web Services, and Computer Networking – applied within enterprise B2B integration systems.
- Studied Managed File Transfer (MFT) architecture and 2 major EDI standards (X12, EDIFACT) governing B2B transaction exchange between trading partners.
- Completed a 2-month structured training program covering professional-development modules, including presentation delivery and business email etiquette.

PROJECTS

URL Shortener *(Spring Boot, MySQL, Redis)*

- Built a URL shortening backend in Spring Boot with Base62-encoded short link generation and MySQL-backed persistence.
- Implemented Redis caching for redirect lookups to reduce response time for frequently accessed links.
- Designed REST APIs for link creation, redirection, and click-analytics tracking.
- GitHub: github.com/theabhay1/chotta-url

Smart Email Reply *(Spring Boot, Google Gemini API)*

- Developed a backend system using Spring Boot to integrate Google's Gemini API for AI-powered email responses.
- Engineered content-processing logic to generate context-aware, ready-to-send replies.
- Architected the solution for modular integration into existing email client workflows.
- GitHub: github.com/theabhay1/Smart-Email-Reply

Sorting Visualizer *(Java, JavaFX)*

- Created an interactive JavaFX application to visualize six major sorting algorithms (Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, Quick Sort, Heap Sort).
- Added step-by-step animations to visually demonstrate algorithm behavior and comparative efficiency.
- Enabled adjustable input size, speed, and array randomness through a configurable interface, enhancing the learning experience.
- GitHub: github.com/theabhay1/Sorting-Visualizer

EDUCATION

Galgotias College of Engineering and Technology, Greater Noida

2022 – 2026

B.Tech in Computer Science

ACHIEVEMENTS & ADDITIONAL INFORMATION

- Earned SQL 50 Badge on LeetCode.
- Solved 300+ Data Structures and Algorithms problems on LeetCode.
- Achieved a typing speed of 95+ WPM, improving coding and documentation efficiency.
- Currently expanding backend skill set with Hibernate/JPA, JUnit, cloud deployment.
